

Spare the Air Resources

- **Spare the Air Experts:** The Air District employs a number of experts that can speak to issues of air quality and its impact in our Bay Area communities. The next time a Spare the Air Alert is called, or if you have more general or specific air quality related questions, please email STA@allisonworldwide.com to be put in touch with a Spare the Air expert spokesperson.
- **Clean HEET Program:** <https://www.baaqmd.gov/funding-and-incentives/residents/clean-heet-program>
 - The Clean HEET Program was developed by the Air District to reduce wintertime wood smoke pollution and improve air quality by incentivizing Bay Area homeowners to replace their existing, operational, freestanding wood stoves or wood-burning fireplace inserts with electric heat pumps.
- **California Clean Air Centers:** arb.ca.gov/cleanaircenters
 - Clean Air Centers provide locations with clean air for Californians to go to during periods of intense wildfire smoke or air pollution emergencies. There are two types of Clean Air Centers: Permanent and Temporary.
- Visit Spare the Air or Air District Websites: sparetheair.org and baaqmd.gov
- Sign up for texts alerts by texting the word "START" to 817-57
- Call 877-4NO-BURN (877-466-2876)
- Sign up for automatic phone alerts by calling 1-800-430-1515
- Sign up for email alerts at sparetheair.org/alerts
